MINING, BUSINESS AND STOCKS.

BURRO PROPERTY WILL SOON START SHIPPING

Begins on May 1-Machinery for Stamp Mill and Power House Has Been Ordered for Mine.

After working quietly in the old Hot Eprings mining district No. 18, between Davis and Salt Lake counties, since 1997, the Burro Mining company, is now of ore has been blocked out, machinery has been ordered for a mill and power plant, a good wagon road constructed and by May 1, ore will be coming down from the mountain to the smelter, and during the sammer will be three or four

eral Manager Pierre Peugeot de-General Manager Pierre Peugeot de-ciared this morning that there is at present three cars of ore ready on the dump for shipment. This ore will av-erage up about \$40 or \$41 a ton. This was taken from the lead-silver vein that runs through the property. It will average 24 ounces in silver, 40.3 per average 24 ounces in silver, 40.3 per cent lead and \$1.80 in gold. The vein has been opened up in various places in the Burro and the Little Giant property which adjoins, for a distance of 3,000

which adjoins, for a distance of some feet.

The ore is opened up by means of a tunnel that is in a distance of 400 feet. During the winter two shifts, seven men in all, have been working opening up the ore. The vein that has been opened is four feet wide and in it is a high grade streak 12 inches wide.

The ore will be hauled down to Woods Cross, a distance of seven miles. Most of the work done last summer was constructing a wagon road to the mine. Steel bridges were put in so that a good safe road now reaches the samp. In drivin gthe tunnel a 17-foot vein of low grade gold ore was encountered. This it is declared will average about \$13 at on in gold. This vein has been developed to considerable extent and the dump is estimated to contain from \$13,000 to \$15,000.

Thus far all the work that has been done by hand. Mankers.

the dump is estimated to contain from \$13,000 to \$15,000.

Thus far all the work that has been done has been done by hand. Machinery has been ordered for delivery at the property by June 1. A 90-horse-power engine and boiler has been ordered for the power plant. This will run the compressor that has been ordered. The compressor is capable of running three heavy drills.

A 10-stamp mill has also been ordered, but this will not arrive until late in June. This mill will be used to treat the gold ore. As the water for the city of Bountiful comes from the mountain on which the company is operating a cyanide process cannot be used. Amalgamation will be the process and it is probable that the tallings will be cyanided. The power for the mill will be generated by a 40-horse power engine and boiler.

The property was worked many years ago by Henry W. Lawrence and others. The old and the new workings in the property amount to 690 feet of shafts and winzes and 1,510 feet of tunnels and drifts.

Supt. Leon Peugeot left for the mine Saturday and will get everything in readiness for an active shipping campaign. As soon as the snow leaves so that work can be commenced a new tunnel will be started. This will cut the gold and the silver-lead veins at greater depth. This tunnel will be

MARKET CONTINUES LIVELY.

Stocks in Some Cases Are Slightly Lower on Exchange.

Although prices were slightly off in several of the securities there was a strong undertone to the market that showed that the public is back in the ame again. The total number of shares disposed

of was 71,067, while the amount represented by the transactions was \$15,-There was considerable trading in Tintic Central today that apparently showed liquidation. There was heavy selling at the opening but the stock came up strong at the close and re-mained steady. Iron Blossom was lower and Nevada Hills showed con-siderable extensity.

siderable strength.

On the curb market the sales were; 500 shares of Seven Troughs Coalition at 36 cents; 1,000 shares of Opex at 30 cents; 500 shares at 30; 1,000 shares of Bingham Central Standard at 20 cents.

Tintic Combination Gets Stringers of Copper in Drift.

(Special to The News.) Provo, April 11 .- Superintendent Elner Duncan hes reported from the Tintic Combination that stringers of Copper ore have been encountered in the drift running east from the shaft on the 220-foot level, and that he be-lieves conditions point to the opening of a large body of ore. Manager Holdaway, of the Tintic

Central states that the contact has been struck and that the drift is in iron ore, similar to that of the Iron Blosson when the contact was struck there. This is considered very en-couraging by Mr. Holdaway, and oth-ers connected with the mine.

OHIO MAKES BIG EARNINGS. Reported That Company Will Change Hands Shortly.

Rumors in the east are again prev-lent that the Ohio Copper is about o change hands. This has been talked I many times but at no time. has here been anything tangible given. F. augustus Heinze, who is reputed to outrol the property, has denied everal times that he does and de-lares that control is outside of his

clares that control is outside of his office.

The latest rumor is that the Ohio Copper will become a Utah copper holding. General Manager Colin Mc-Intosh, who is better acquainted with Ohio Copper affairs than any man in the company, is now in the east and it is said that he is seeking \$800,000 with which to complete the two remaining sections of the Ohio Copper will. The officials of the Utah Copper will be in New York on April 22 to attend the annual meeting and it may be then that something may be done. Relative to the Ohio Copper the Boston Financial News says:

The report that the Ohio Copper company had successfully financed itself, by borrowing \$600,000, with its bonds as collateral, appears to have been premature. Negotiations for such financing are under way, but have not been concluded, and General Manager McIntosh.

York in connection with this matter. For February the Ohio Copper company earned \$35,000 net on the treatment of 1,000 tons per day, and the above financing will permit it to increase this capacity to 3,000 tons per day and treble present earnings.

MENDA GETS NEW CONTRACT.

That Pioche mines will shortly be sending considerable ore to the smelter as soon as the road is rebuilt to that camp is shown by the new contract that the Mendha-Nevada mine has just signed with the United States smelter. This is one of several others that will be signed up shortly. The old contract expired on April 1 after being in operation for 18 months. Under the new contract the company is to ship from 500 to 1,000 tons of ore every month. With the new developments at the mine a greater tonnage could be shipped out. The amount of ore in sight now is greater than it has ever been at any time in the property.

With the terms of the contract the management is much better pleased That Pioche mines will shortly be

management is much better pleased than with the old one which it is de-clared was an excellent one. Preparations have been made for steady shipping as soon as the road is open. One car is already loaded for shipment. The bins are full and two winzes are full of ore ready to be removed at a moment's notice.

EXPECTS TO SHIP BY JUNE.

Revenue Consolidated Management Soon to Connect Shaft and Tunnel.

Although developments have not opened what was expected at the Revenue Consolidated property in Beaver county, it has been sufficient to give the management evidence that some shipping can be done by June. Since early last fall the company has had a force of nine men at work on the property driving a tunnel to connect up with the shaft.

The shaft is now in about 800 feet and an upraise is being sent up to catch the shaft. This is now up 48 feet and about 40 feet remains to be done. This will be finished by the first of the month.

which can be taken out as soon as the tunnel is connected as it will allow good drainage. The tunnel is 256 fect below the collar of the shaft. below the collar of the shaft.

In the shaft the ore was of a high grade containing considerable gold and good values in lead and silver. In the tunnel two good shoots of ore were encountered. As soon as the tunnel is finished, the men will be set to work raising and sinking on the ore found in the tunnel. This it is declared will undoubtedly open up some good ore.

According to L. G. Burton, one of the interests in the company, the vein on which the tunnel was run has not turned out to be the one that was cut in the shaft, but a parallel vein. The vein that cuts through the shaft will also be explored as soon as the tunnel is completed. In this vein much high grade ore has been found.

doubtedly open up some good ore

MORE ORE IN PACIFIC.

Strike in Lower Tunnel Looks Like Shipments.

Shipments.

The directors of the Pacific are feeling happy over the good showing made in the contract recently let to extend the development work on the lower tunnel level. The miners had driven the tunnel but a few feet, when a small stringer of high grade carbonate silver lead ore was encountered, the work was pushed ahead and this streak has widened until they now have six inches of the good ore. The whole tunnel is highly mineralized ore matter, carrying values in silver, lead matter, carrying values in silver, lead and zinc, which an average assay gives, 8.1 ounces silver and 22 per cent lead. The ore streak proper shows 42 per cent lead and 12.8 ounces silver. It looks like the Pacific will soon be shipping ore, as the strike looks bigger every shift.

OIL EXCITEMENT AT SULPHUR. Land Staked Out for 20 Miles Around Pacific Well.

Pacific Well.

The indications of oil around Sulphur on the Western Facific has aroused a great deal of excitement in that section of Nevada, according to John W. Geiger, secretary of the Nevada Superior Mining company, who was recently in the district. While he was there he says the Western Pacific well, sunk for water, was bringing up considerable oil in the water and that there was a strong flow of gas.

While Mr. Geiger was there he says the pump was stopped after having been worked for some time. To show the strong flow of gas from the well the gas flowing from the pipe was ignited. A flame that jumped forward a foot or more and burned for several minutes.

minutes.
wo companies are now drilling for
in the district and the ground for
miles around the place has been

staked out.

According to the record of the Western Pacific well the formation is about
as follows: First 200 feet, alluvium or
"wash" and the usual detritus found in
flat areas of Nevada; next 220 feet blue
shale with traces of crude parafine
at about 350 feet. Directly under the,
blueshale a thin stratum of sandstone,
not more than two feet thick.

Directly underneath this sandstone
stratum was encountered a layer of

stratum was encountered a layer of black crude parafine nearly five feet thick. This stratum is declared to be sibilar to that encountered in the Coalinga fields, with the exception that the fields, with the exception that the stratum at Sulphur is thicker. Sand clap and water are found to the 725-foot level, when blue shale carrying oil indications are encountered. At 970 feet the well had enough water to sat-lefy the officials and drilling was

YEAR'S SHIPMENTS AHEAD.

sensational strike as recently rumored, Dr. W. J. Holden, manager of the company, says, he believes he would be safe in stating the ore veins developed will keep the mine on the shipping list for at least a year. About four car loads of ore have accumulated at the mine during the bad condition of the road. The first car since the road has been repaired, is now being loaded at the Salt Lake Boute depot at America. at the Salt Lake Route depot at Ameri-

WILL SHIP THIS SPRING.

Death Canyon Property in Erickson District Strikes Pay Ore.

Greater activity than ever before is Greater activity than ever before is now evident in the Erickson mining district. A large force of men is now working on the Blaine property in Cottonwood canyon. Another force is busy on the Spiker ground and Abnér Cook, R. M. Hoit and others have their men at work on claims that they own in the district. It is declared that the Erickson district is one of the most promising and

rict is one of the most promising and east explored districts of Utah. It is not as far from the railroad as many of the districts of Utah and the Camel Back mountains along which it lays are declared to be among the most highly mineralized in the state.

The Death Canyon property, which has been worked for some time is reported to have struck a face of seven

ported to have struck a face of seven feet of ore averaging \$54 to the ton, in the face of the tunnel. The lowest grade of ore taken out is said to run \$30 a ton, while the highest is about \$110. The tunnel is in a distance of 363 feet and half a car of ore is now on the dump ready for shipment. The ore is lead, sliver and gold, with a good excess of iron. Some of the ore has run as high as \$18.70 in gold and in places good showings of copper have been made.

The property is well equipped and according to the control of the c

cording to Manager Henry E. Browne is able to ship regularly this spring. The ore can easily be hauled to Jerico or the Salt Lake Route and from there goes directly to the smelter at Gar-field.

CONCENTRATES.

Duncan MacVichie has returned after several weeks spent on business in the northwest.

Henry Catrow has returned after several weeks spent in the east on bus-iness and pleasure. J. M. Bennett of South Dakota is in

the city as the guest of George H.Rath-man of the American Flag company. According to Supt. C. C. Griggs, the

Uncle Sam mine will be able from now on to send out a carload of ore a day. The Steptoe smelter at McGill failed to reach the 6,000,000 mark for March. The plant made 5,800,000 pounds of copper during the month.

The buildings are completed and the machinery is being installed for the Homber Mining & Manufacturing company's paint plant at Ogden. At the meeting of the directors of the May Day Saturday no assessment was levied as was expected by some. The

ompany is now paying its own ex-Frank J. Busch of Goldfield is in the city. He is on his way to New York on

trains to meet several of his friends. John Heimrich, who has been closely connected with many of the mining interests in Utah, but who is now heavily interested in lumber and other busi-

nesses in Oregon, is in the city. General Manager Morris P. Kirk the Imlay mill and mine in Humboldt county, Nev., says conditions at the property are now better than they have ever been before.

A report from Reno says that George R. Raymond, W. D. Bohm and A. E. Keables of Salt Lake have taken over the Black Warrior group of claims in the Oak Spring district in southern Nye county, Nev.

T. S. Buckingham, who was for sev eral years connected with the office of F. Augustus Heinzie is in the city. He is looking over various mining properties and also taking a fively interest in irrigation and dry farming.

E. C. Coffin, superintendent of the Lower Mammoth mine, was in the city Saturday. Hes declared that the ore body is opening up with better results than the company expected. From indications between the 1,700 and 1,800 levels, it is almost certain that the ore body will be found on the 2,000 feet. ore body will be found on the 2,000-foot

The Goldfield Consolidated handled an immense tonnage of ore last month.
According to the estimates of the general manager of the mill, during March, treated 26,617 tons of ore, an average of 861 tons a day, of an estimated gross value of \$1,015,000, a recovery of approximately \$950,000, total costs of \$220,000 and net profits to the company of

J. K. Turner, chief engineer for A. D. Myers of Los Angeles arrived in the city today from Arizona. He will leave at once to look over the Ely Calmuet property at Ely. The latest reports from the property he says is that the company now has a showing of 13 feet of lead, silver, copper and gold ore that will average \$35.60 a ton. Relative to the consolidation with the Ely Centennial he declares that the companies were undoubtedly willing. The Ely Calumet he declared would want a little the best of the deal on account of its 400 acrès of mineral ground.

CHICAGO.

CHICAGO.

Chicago, April II.—The wheat market was weak during early trading today owing to general selling based on rains in the southwest including Kansas, where the new crop had suffered the greatest injury from drouth.

An official forecast for additional showers for tonight and tomorrow from Kansas augmented the selling pressure. Quotations at the opening snowed declines of % \$\phi\$ to \$\frac{1}{2}\$ to \$\frac{1}{2}\$ to \$\frac{1}{2}\$ and on September 1.02% to \$\frac{1}{2}\$ to \$\frac{1}{2}\$ and on September 1.02% to \$\frac{1}{2}\$ to \$\frac{1}{2}\$ and off to 1.06% and September to 1.02% the end of the first hour July had sold off to 1.06% and September to 1.02% \$\phi\$.

Continued slack demand for the cash grain, together with the heaviness of wheat, prompted fairly liberal sales of corn during early trading which resulted in material declines in all deliveries. The May option which opened \$\frac{1}{2}\$ to \$\frac{1}{2}\$ hower at \$\frac{1}{2}\$ to \$\frac{1}{2}\$ on covering by shorts.

Oats also were weak owing to the decline in wheat and corn and to ravorable crop reports.

The May delivery opened \$\frac{1}{2}\$ lower at \$\frac{2}{2}\$, advanced to \$\frac{1}{2}\$ and then dropped back to \$\frac{1}{2}\$.

The May delivery opened \$\frac{1}{2}\$ lower at \$\frac{2}{2}\$, advanced to \$\frac{1}{2}\$ and then dropped back to \$\frac{1}{2}\$.

The May delivery opened \$\frac{1}{2}\$ lower at \$\frac{2}{2}\$, advanced to \$\frac{1}{2}\$ and then dropped back to \$\frac{1}{2}\$.

The May delivery opened \$\frac{1}{2}\$ lower at \$\frac{2}{2}\$, advanced to \$\frac{1}{2}\$ and then dropped back to \$\frac{1}{2}\$.

The hear has the final hour July declined in live hogs. Trading was quiet at the start. May pork opened \$2\frac{1}{2}\$ lower at \$2\$.

\$2\frac{1}{2}\$ lard \$\frac{1}{2}\$ lower at \$18.55\$ and \$\frac{1}{2}\$ and the final hour July declined to 1.04\$ with the exception of a mild raily toward midday the market was weak all day; during the final hour July declined to 1.04\$ while September sold off to 1.04\$ at 1.04\$ \$\frac{1}{2}\$ s.

Higgins of Salt Lake, resident agent for Utah.

LOCAL MARKETS

Today's market receipts include two Today's market receipts include two cars of fancy potatoes "Early Ohio" from Colorado, and "Peerless" from Idaho, a car of tomatoes from Florida, Utah asparagus, with asparagus also from Moapa, California asparagus is now out of season, and there is no more shipping. Very good young Utah onions are at hand, as also the first shipment of Florida eggalso the first shipment of Florida egg-plant. There is a slight reduction in both Timothy and alfalfa, with further reductions coming as the season opens. The big rise in hay that marked last spring is noticeable by its absence this year. Eggs are stiffening again, but this can not last long. Oleomargarine still continues to hold its own, as though it had come to stay in permanent commetition with stay in permanent competition with butter. The quotations obtaining to-day are as follows:

Mrs. Crockwell and children of 115 Third avenue, have gone to Buhl, Idaho, to join Mr. Crockwell, who is general manager of the Bullion Coali-tion mines there, A. S. Holden, western manager of the Stearns automobile company Cleveland, is at the Knutsford, establish an agency here.

I. Bernstein has gone Angeles on a pleasure trip.

HOLD REGULAR MEETINGS. HOLD REGULAR MEETINGS.

(Special to The News.)

Provo, April 11.—The regular monthly meetings of the Colorado and Iron Blossom mining companies were held here today. No statement was made as to the earnings of the companies but reports from the superintendent showed that both properties are in good shape and developments are as encouraging as could be expected.

There was no meeting of the Grand Central and Victoria directors. A meeting of the Sioux directors was held in Salt Lake.

The monthly meeting of the Opex Consolidated will be held tomorow.

MUST MAKE REPORTS.

Several of the local brokers falled to hand in their financial statements to the board of governors of the Sait Lake Stock & Mining exchange Saturday. As they declared that the time within which to make their reports was too short, the board announced that they would have until the close of business tomorrow to file the statement showing the number of members connected with them in the brokerage brainess, the bank through which they do business and their financial strong.
